

	<p>NOVIKOV, Alexander S. Candidate of Science (St. Petersburg State University)</p>
Research interests	Studying the properties of (bio)active and functional chemical systems at all levels of matter organizations (from the nano- to the macrolevel) using DFT calculation methods, chemoinformatics, correlation analysis, computer modeling and the creation of descriptor systems for describing complex macromolecules
List of the supervisor's research projects (participation/supervision)	The project "Infochemistry Scientific and Educational Center" (participation)
List of potential thesis topics	Studying the properties of (bio)active and functional chemical systems at all levels of matter organizations (from the nano- to the macrolevel) using computer modelling
Publications in the last five years	240 (Scopus / Web of Science / RSCI)
